

- ◉ Reduces risk of damage from flying debris.
- ◉ Durable 2-ply close-knit PVC mesh catches debris, whilst ensuring Debris-Guard is stable by allowing wind to blow through.
- ◉ Standard Grade reflective panels ensure product conforms for use on the road. Double-sided for extended product life.
- ◉ Uni-directional variable height hinges ensure stability on uneven ground & enable each 3-sided section to be joined together.
- ◉ Folds flat for a convenient, easy to transport and store solution.

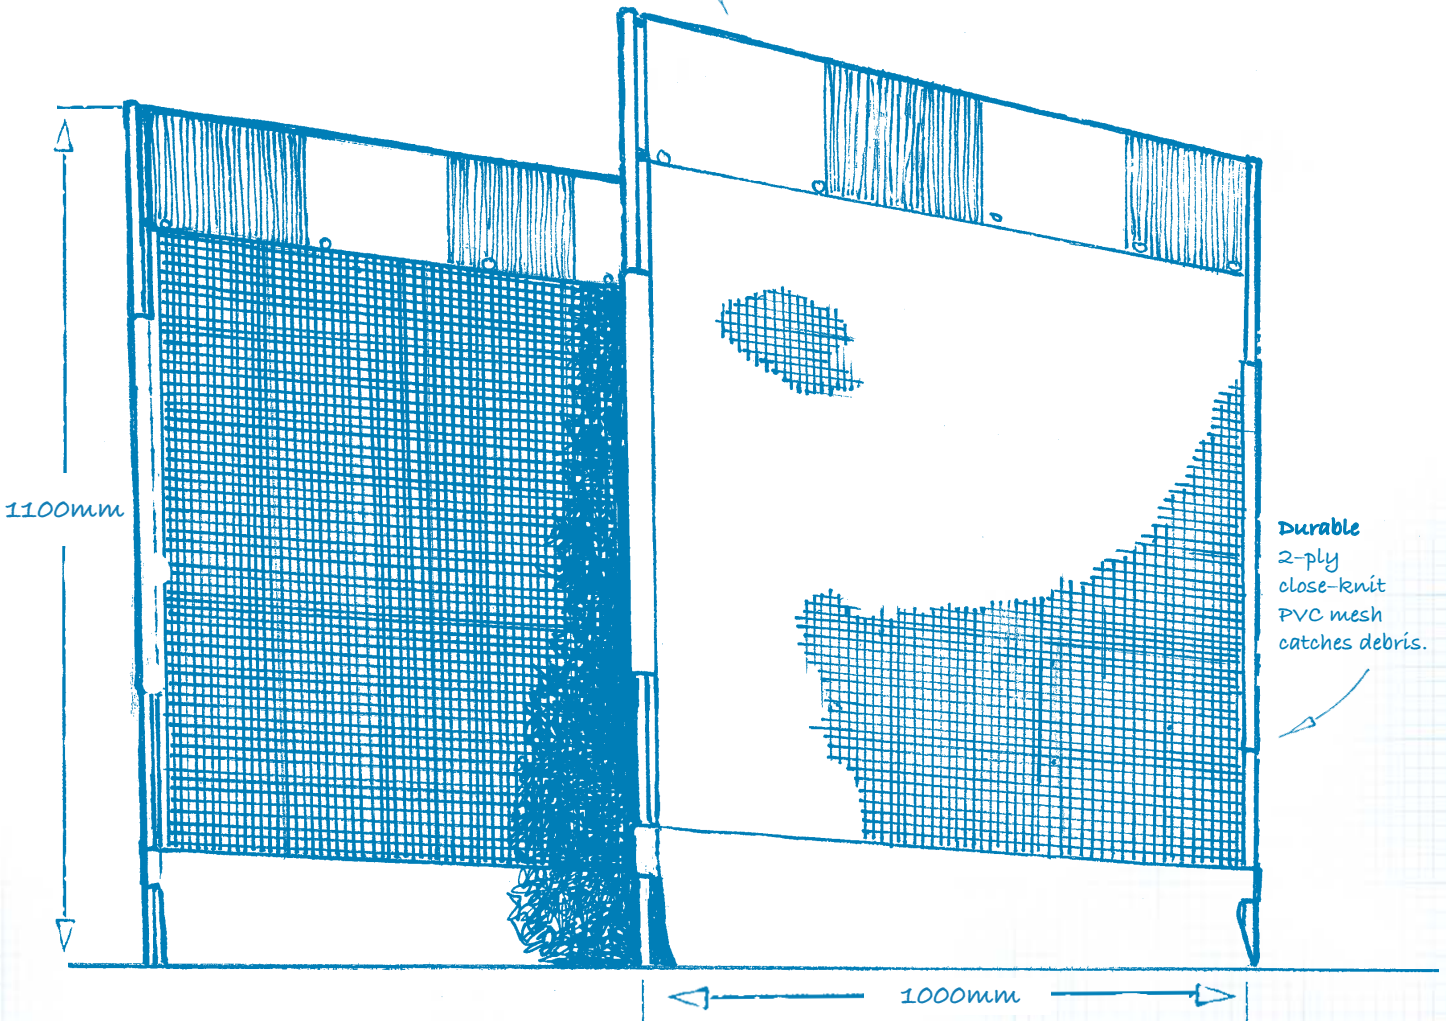

Corporate logos can be embossed into reflective.

Tubular steel frame is powder coated in red. Other colours are available to special order.

Polypropylene hinges uni-directional and enable easy addition of further sides if required.

Standard+ Grade reflective panels are double-sided for extended life.

Durable 2-ply close-knit PVC mesh catches debris.
