**In arborist circles, Tachyon** has quickly become the most popular of 24-strand ropes. Thanks to its unparalleled feel and its exceptional performance, it is ideal for use with the latest mechanical systems. Its firm and yet flexible design featuring a polyester cover significantly improves friction hitch performance without „baginess“. The inner core keeps the diameter constant, even under load, for improved grip and less hand fatigue.

## Features

- functions perfectly in combination with standard hardware designed for use with 11 mm ropes
- 11.5 mm diameter for improved grip and reduced hand fatigue
- low stretch at low loads for less bounce while climbing
- high stretch at high loads to minimize impact in the event of a fall
- consistent diameter while climbing ensures improved grip
- easy to splice
